Digital Image Processing

Zhen Li

lizhen@cuhk.edu.cn

School of Science and Engineering,
The Chinese University of Hong Kong, Shen Zhen

Basic Information

- Time & Venue
 - Tuesday: 10:30 am – 12:00 pm, TA207
 - Thursday: 10:30 am – 12:00 pm, TA 207
- Staff
 - Instructor: Zhen Li (lizhen@cuhk.edu.cn)
 - Tutors: Qin Wang (wangqin4377@qq.com)
Bin Zeng (zeng_bin8888@163.com)
- One tutorial per week:
Thursday: 8:00pm – 9:00pm, TA 207

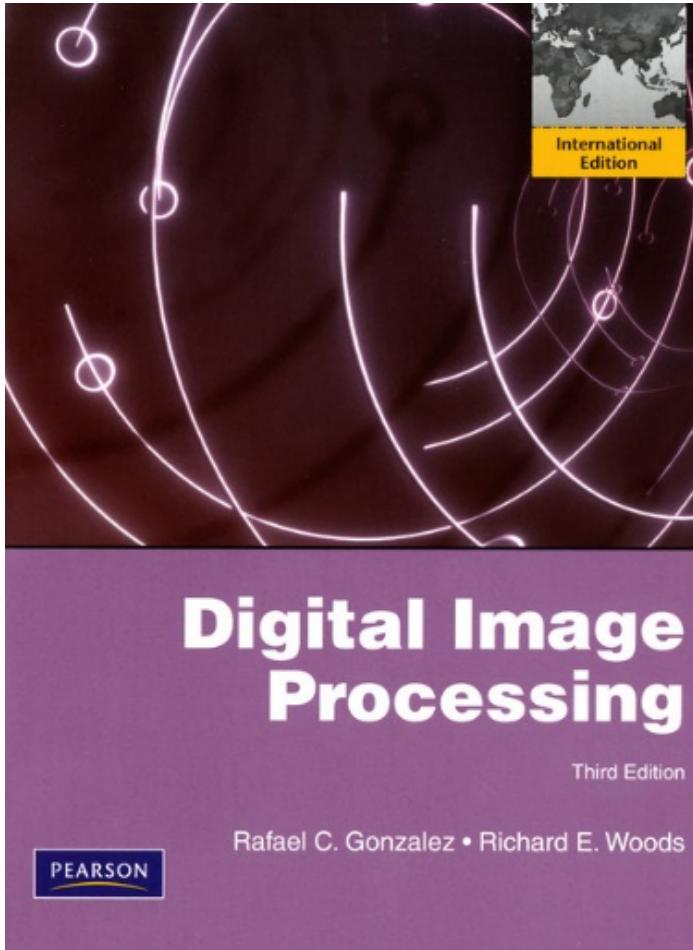

Slides

- Online address:
 - https://github.com/icemansina/CUHK SZ_DIP
- We use this repository for:
 - Make announcements
 - Release lecture slides
 - Release homework assignments
 - Discussions: wechat group

Digital Image Processing

By *Rafael C. Gonzalez & Richard E. Woods*

Grading

- Three assignments: 10% x 3
- Mid-term exam: 30%
- Final project: 40%
 - Topics
 - Applications of digital image processing
 - Implementation of digital image processing
 - Study digital image processing algorithms
 - You (at most two students as a group) should submit
 - One page proposal which briefly introduces the topic, idea, method, experiments.
 - A term paper of 4 pages (excluding figures) in maximum, double column, font size is equal or no larger than 10.
 - Code and sample data
 - Project presentation (5mins – 10mins)

What is this course about?

Face Beautification

Image Filtering

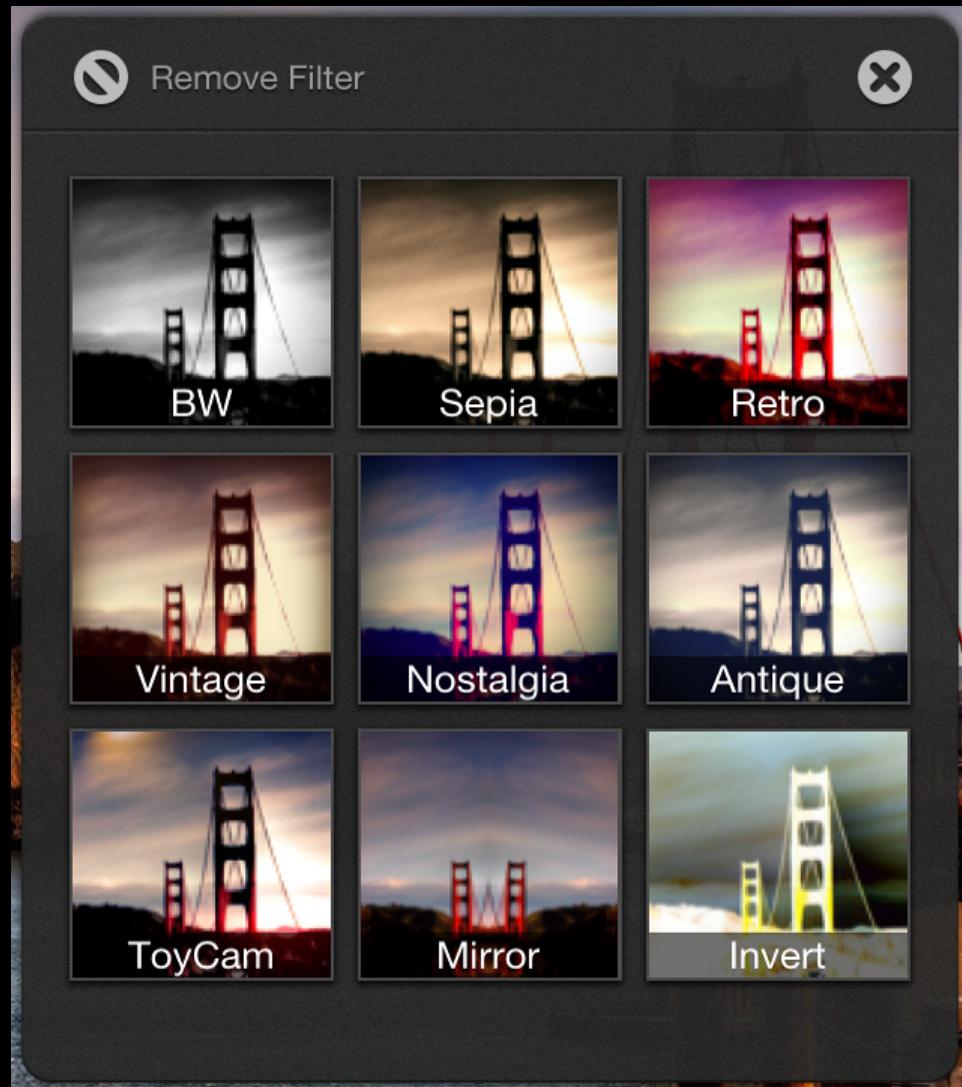

Image Superresolution

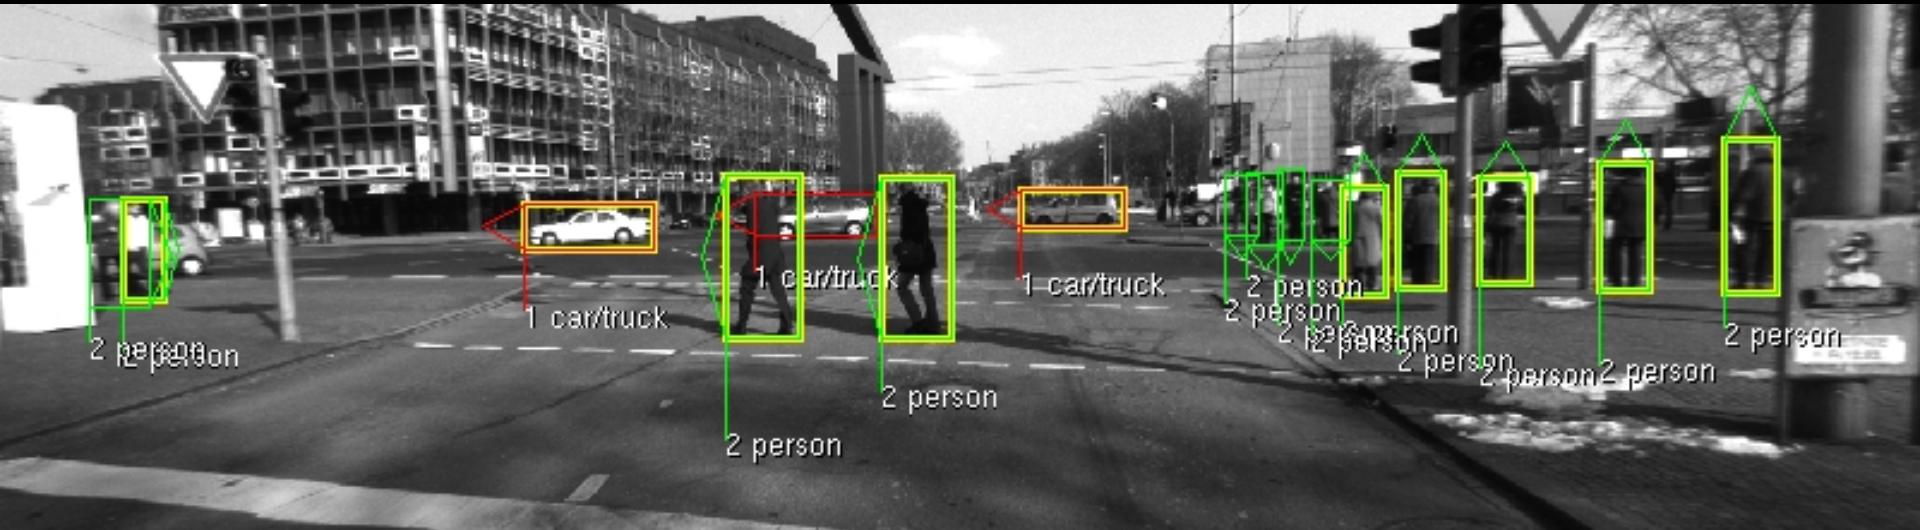

Face Recognition

Object Recognition

Pedestrian Detection

Scene Parsing

Topics

Image Representations

- Image Sensing and Acquisition
- Sampling and Quantization
- Basic Relationships between Pixels

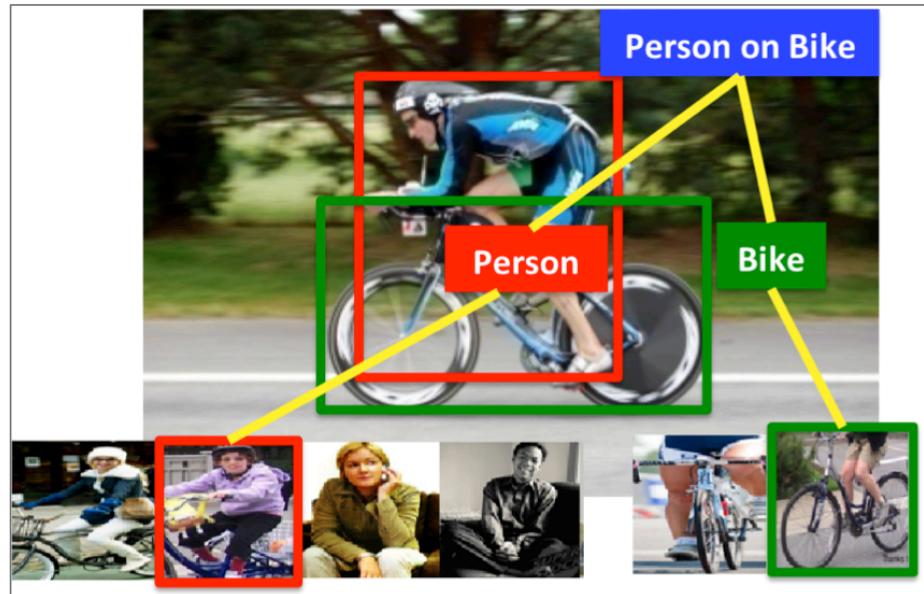

Image Processing

- Gray-level processing
- Image filtering
- Image restoration
- Morphological processing

Visual Understanding

- Features
- Image recognition
- Object detection
- Image segmentation

What is an Image?

- 2-dimensional matrix of Intensity (gray or color) values

Set of Intensity values

Image coordinates
are integers

$$I(u, v) \in \mathbb{P} \quad \text{and} \quad u, v \in \mathbb{N}.$$

$F(x, y)$

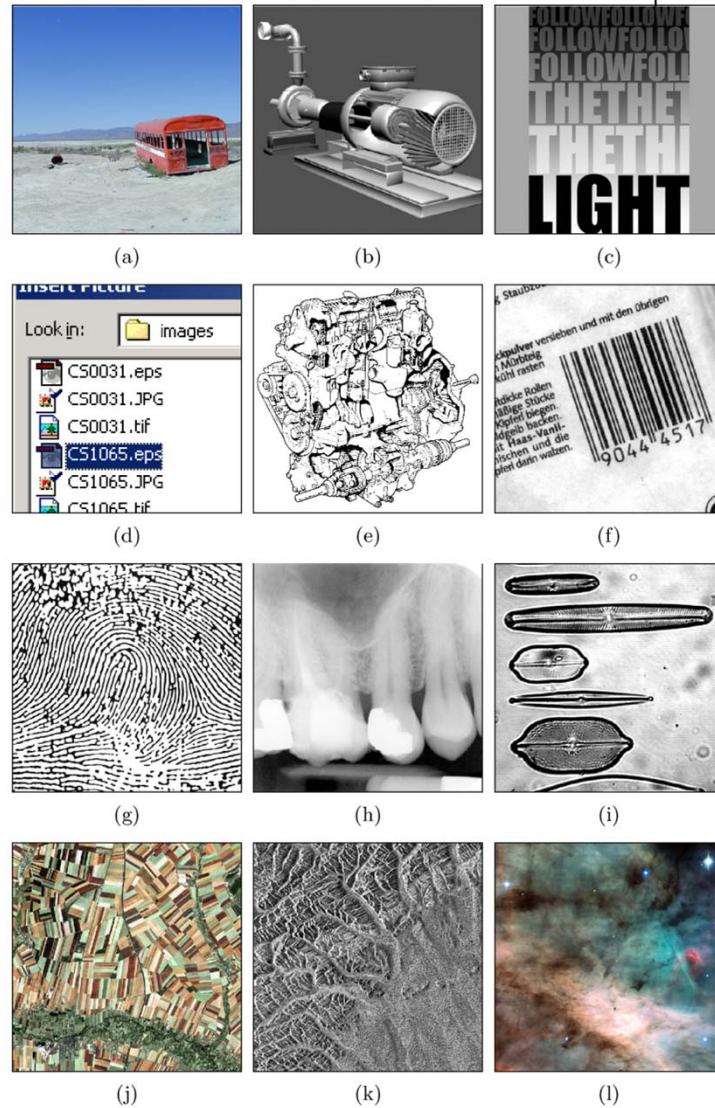

148	123	52	107	123	162	172	123	64	89	...
147	130	92	95	98	130	171	155	169	163	...
141	118	121	148	117	107	144	137	136	134	...
82	106	93	172	149	131	138	114	113	129	...
57	101	72	54	109	111	104	135	106	125	...
138	135	114	82	121	110	34	76	101	111	...
138	102	128	159	168	147	116	129	124	117	...
113	89	89	109	106	126	114	150	164	145	...
120	121	123	87	85	70	119	64	79	127	...
145	141	143	134	111	124	117	113	64	112	...
⋮	⋮	⋮	⋮	⋮	⋮	⋮	⋮	⋮	⋮	⋮

$I(u, v)$

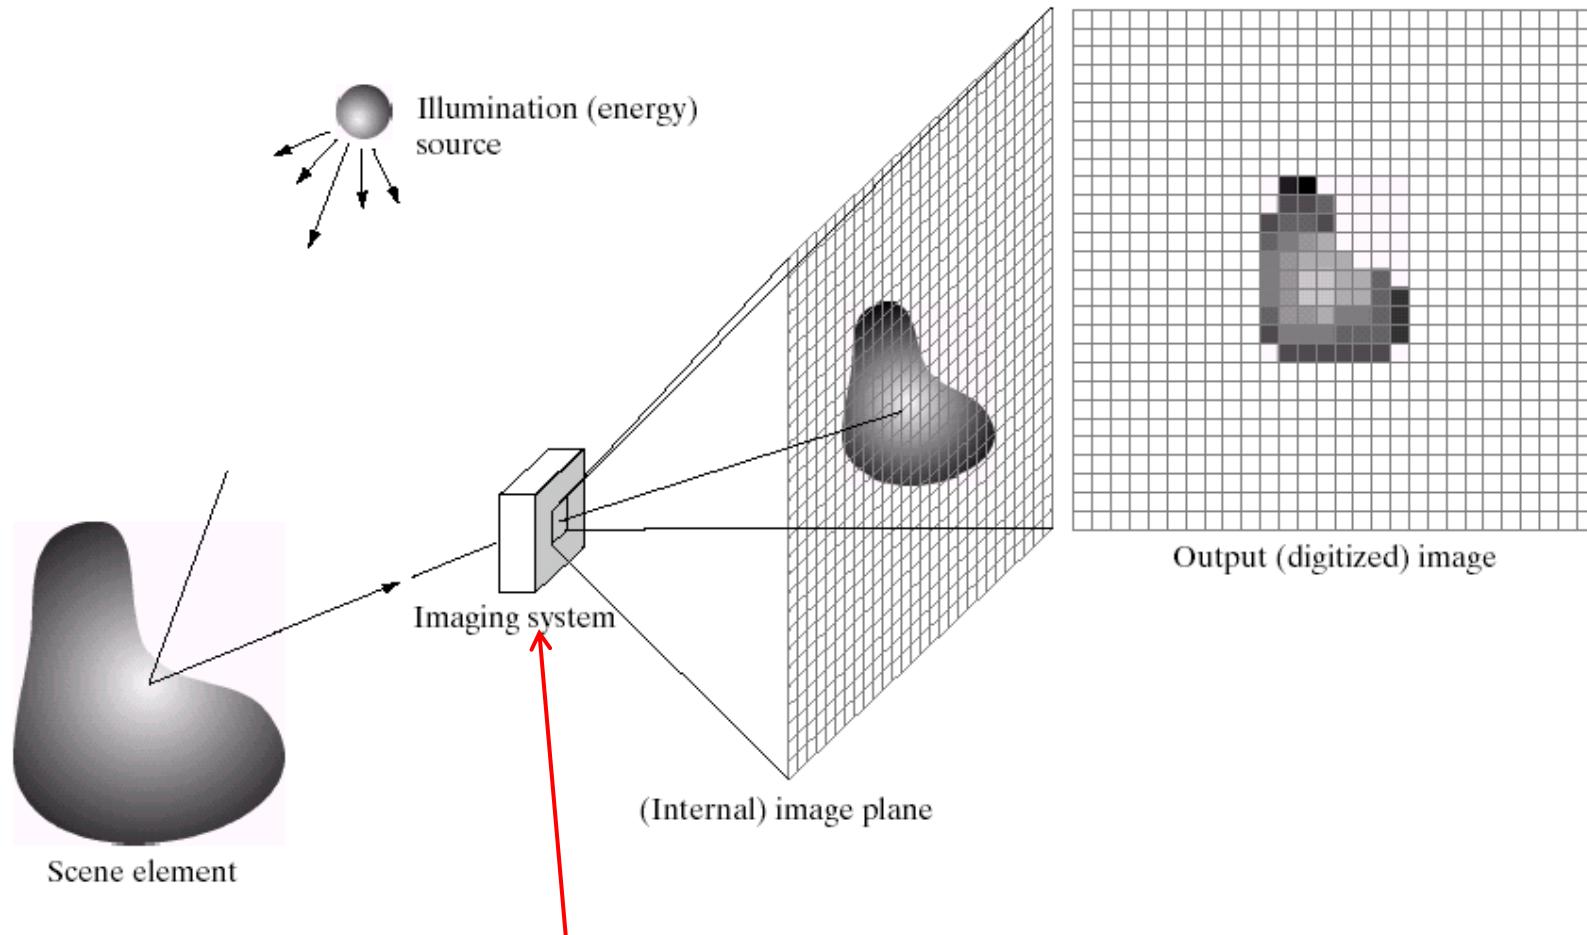

Example of Digital Images

- a) Natural landscape
- b) Synthetically generated scene
- c) Poster graphic
- d) Computer screenshot
- e) Black and white illustration
- f) Barcode
- g) Fingerprint
- h) X-ray
- i) Microscope slide
- j) Satellite Image
- k) Radar image
- l) Astronomical object

Imaging System

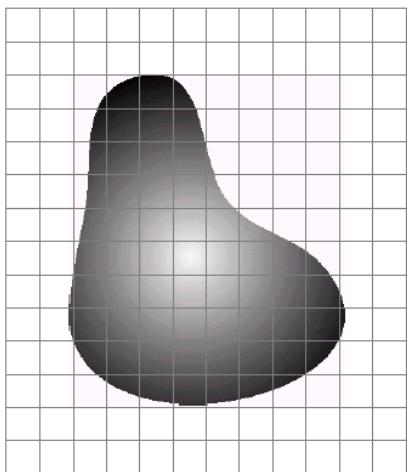

Example: a camera
Converts light to image

Credits: Gonzales and Woods

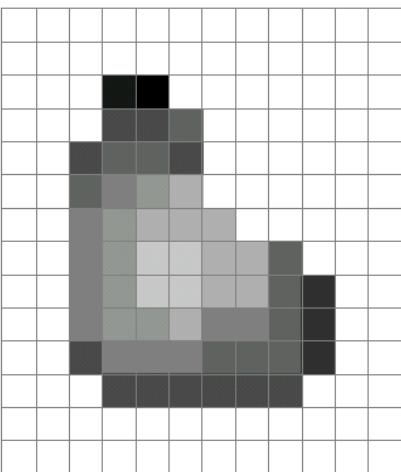

Digital Image?

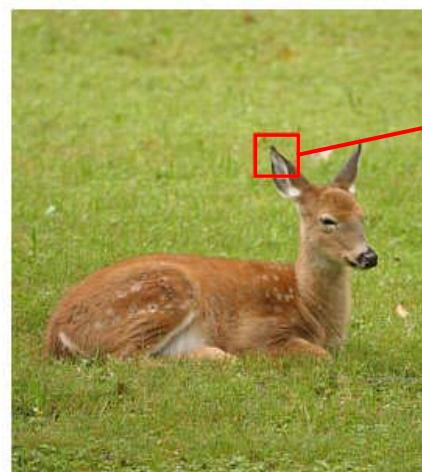

- Remember: *digitization* causes a digital image to become an *approximation* of a real scene

Real image

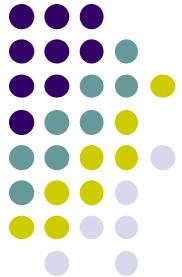

Digital Image
(an approximation)

Real image

Digital Image
(an approximation)

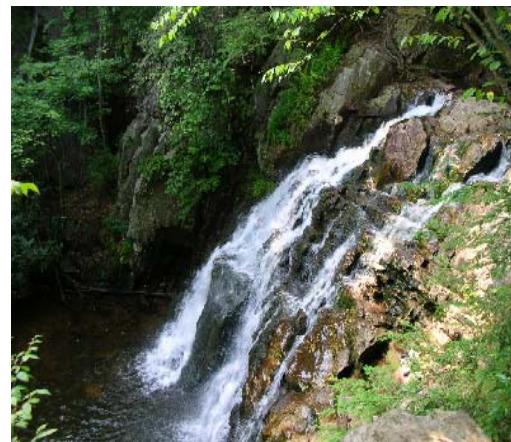

Digital Image

- Common image formats include:

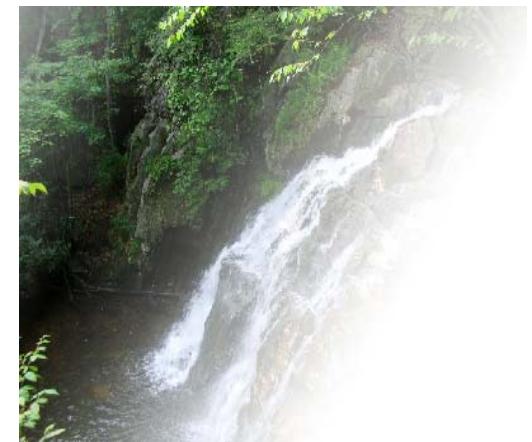

- 1 values per point/pixel (B&W or Grayscale)
- 3 values per point/pixel (Red, Green, and Blue)
- 4 values per point/pixel (Red, Green, Blue, + “Alpha” or Opacity)

Grayscale

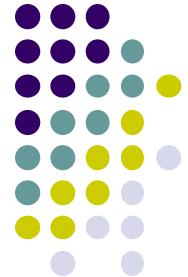

RGB

RGBA

- We will start with gray-scale images, extend to color later

What is image Processing?

- Algorithms that alter an input image to create new image
- Input is image, output is image

Original Image

Processed Image

- Improves an image for human interpretation in ways including:
 - Image display and printing
 - Image editing
 - Image enhancement
 - Image compression

Example Operation: Noise Removal

Noisy Image

Denoised Image

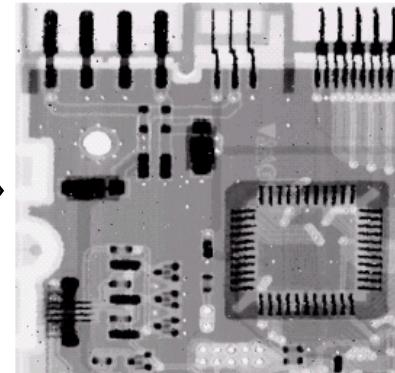

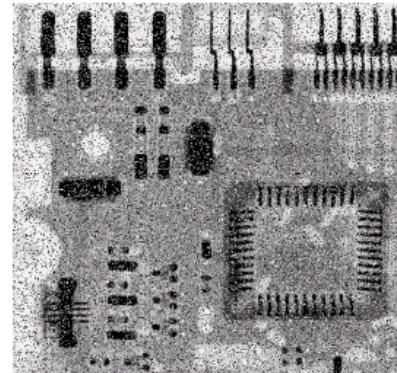

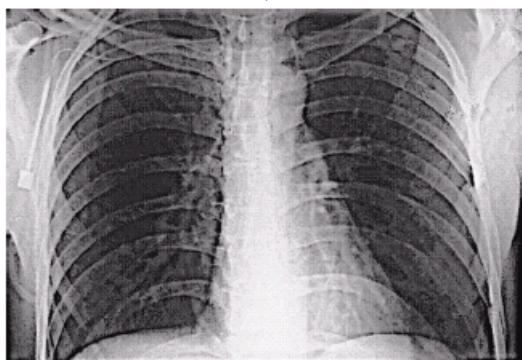

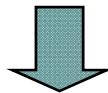

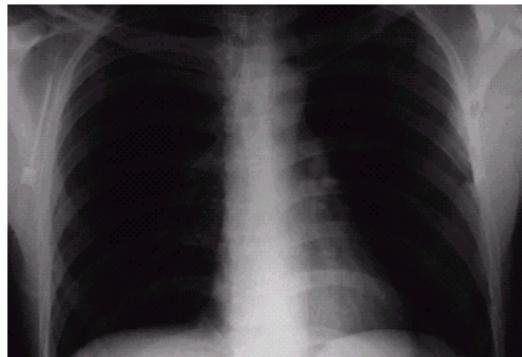

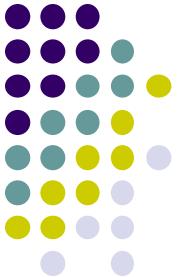

Think of noise as white specks on a picture (random or non-random)

Examples: Noise Removal

Images taken from Gonzalez & Woods, Digital Image Processing (2002)

Example: Contrast Adjustment

Low Contrast

Original Contrast

High Contrast

Example: Edge Detection

Example: Region Detection, Segmentation

Example: Image Compression

Original, 2.1MB

JPEG Compression, 308KB (15%)

Example: Image Inpainting

Damaged Image

Restored Image

Credit: M. Bertalmio, G. Sapiro, V. Caselles, C. Ballester: *Image Inpainting*, SIGGRAPH 2000

Inpainting? Reconstruct corrupted/destroyed parts of an image

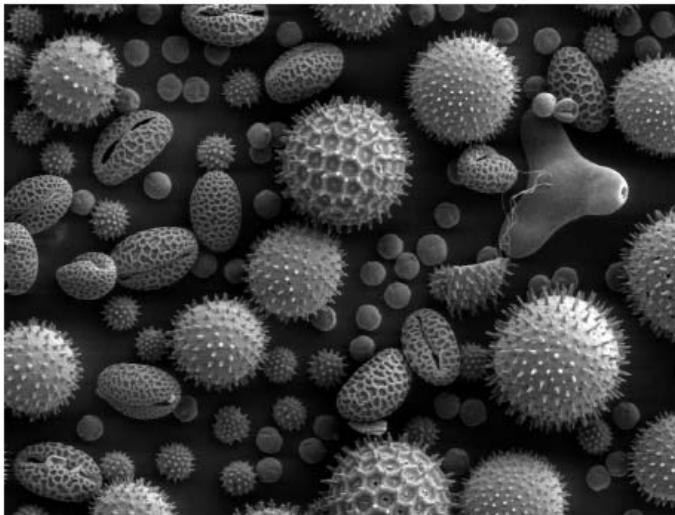

Examples: Artistic (Movie Special)Effects

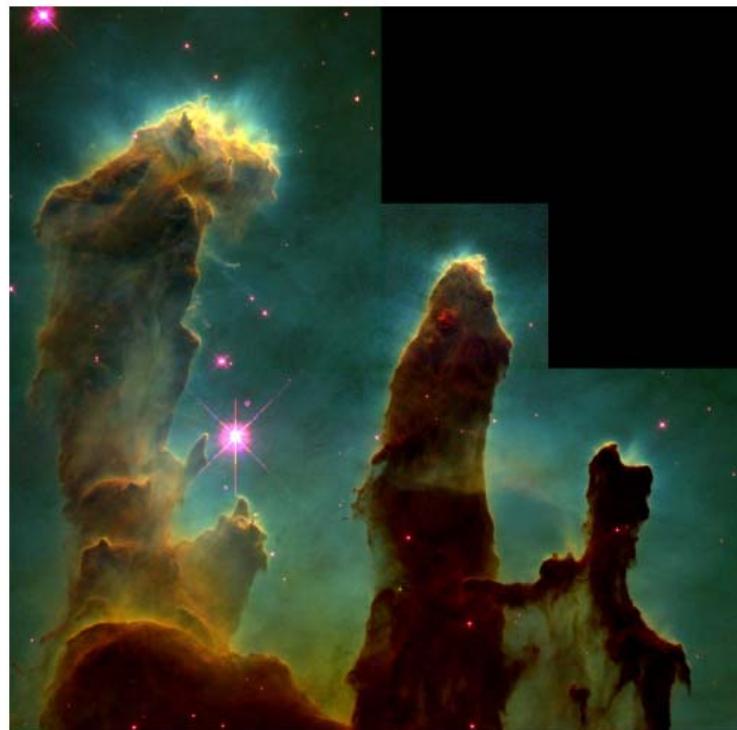

Applications of Image Processing

Biology

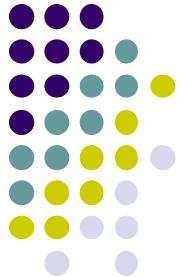

Credit: Dartmouth Electron Microscopy Facility

Astronomy

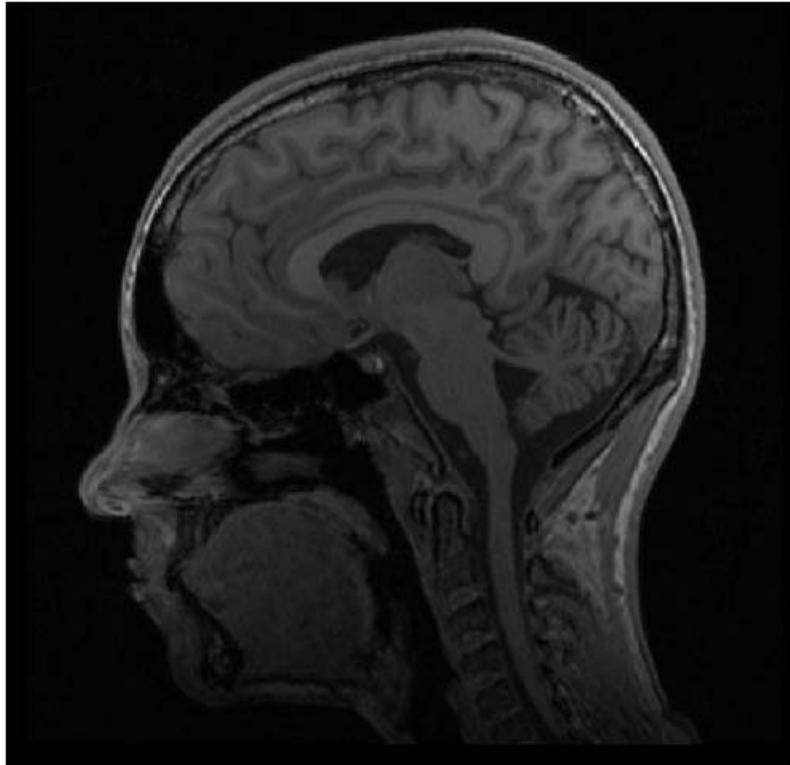

*Credit: NASA, Jeff Hester, and Paul Scowen (Arizona State)
More info here*

Applications of Image Processing

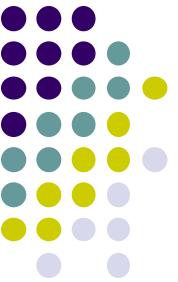

Medicine

Credit: Dr. Janet Lainhart, UofU Psychiatry

Security, Biometrics

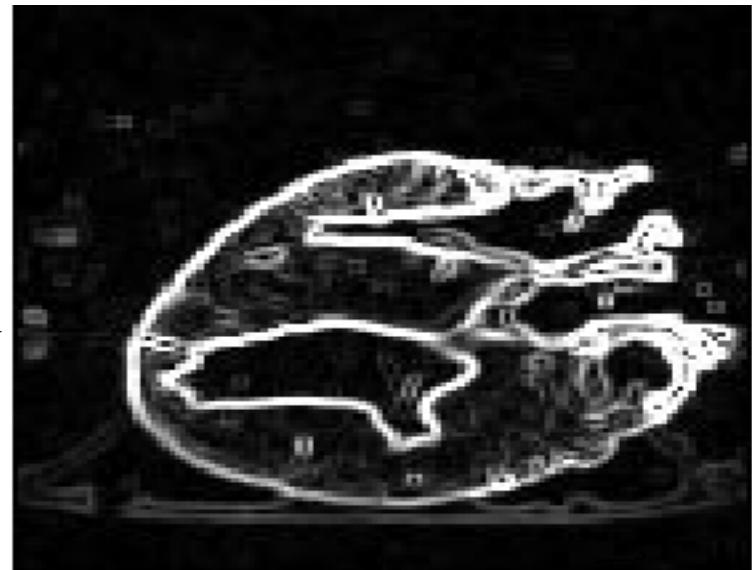

Applications of Image Processing: Medicine

Images taken from Gonzalez & Woods, Digital Image Processing (2002)

Original MRI Image of a Dog Heart

Edge Detection Image

Applications of Image Processing

Satellite Imagery

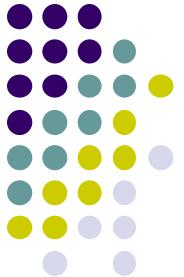

Credit: NASA

Personal Photos

Credit: Tom Fletcher

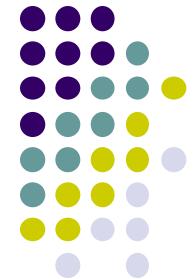

Applications of Image Processing: Geographic Information Systems (GIS)

- Terrain classification
- Meteorology (weather)

Applications of Image Processing: Law Enforcement

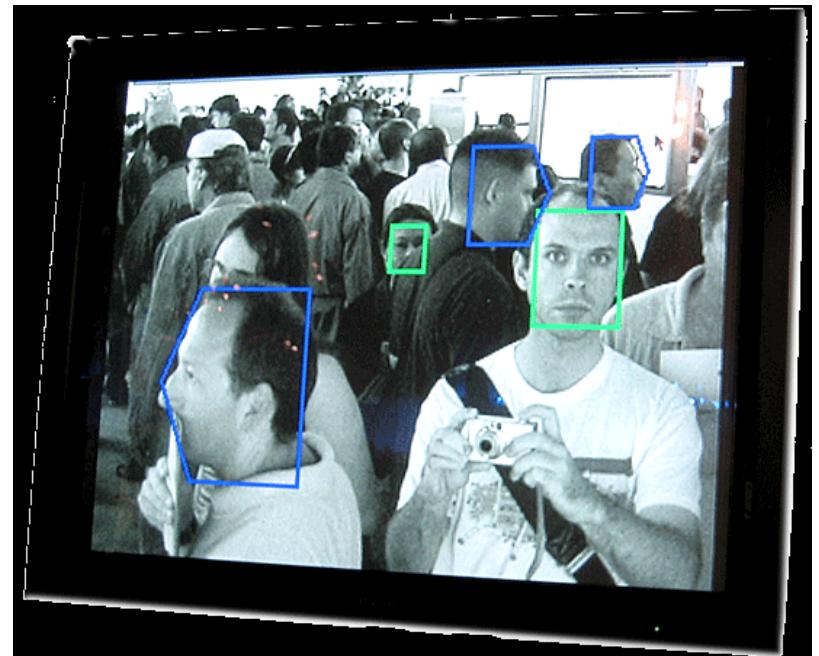

- Number plate recognition for speed cameras or automated toll systems
- Fingerprint recognition

Applications of Image Processing: HCI

- Face recognition
- Gesture recognition

Relationship with other Fields

Computer Vision

Object detection, recognition, shape analysis, tracking
Use of Artificial Intelligence and Machine Learning

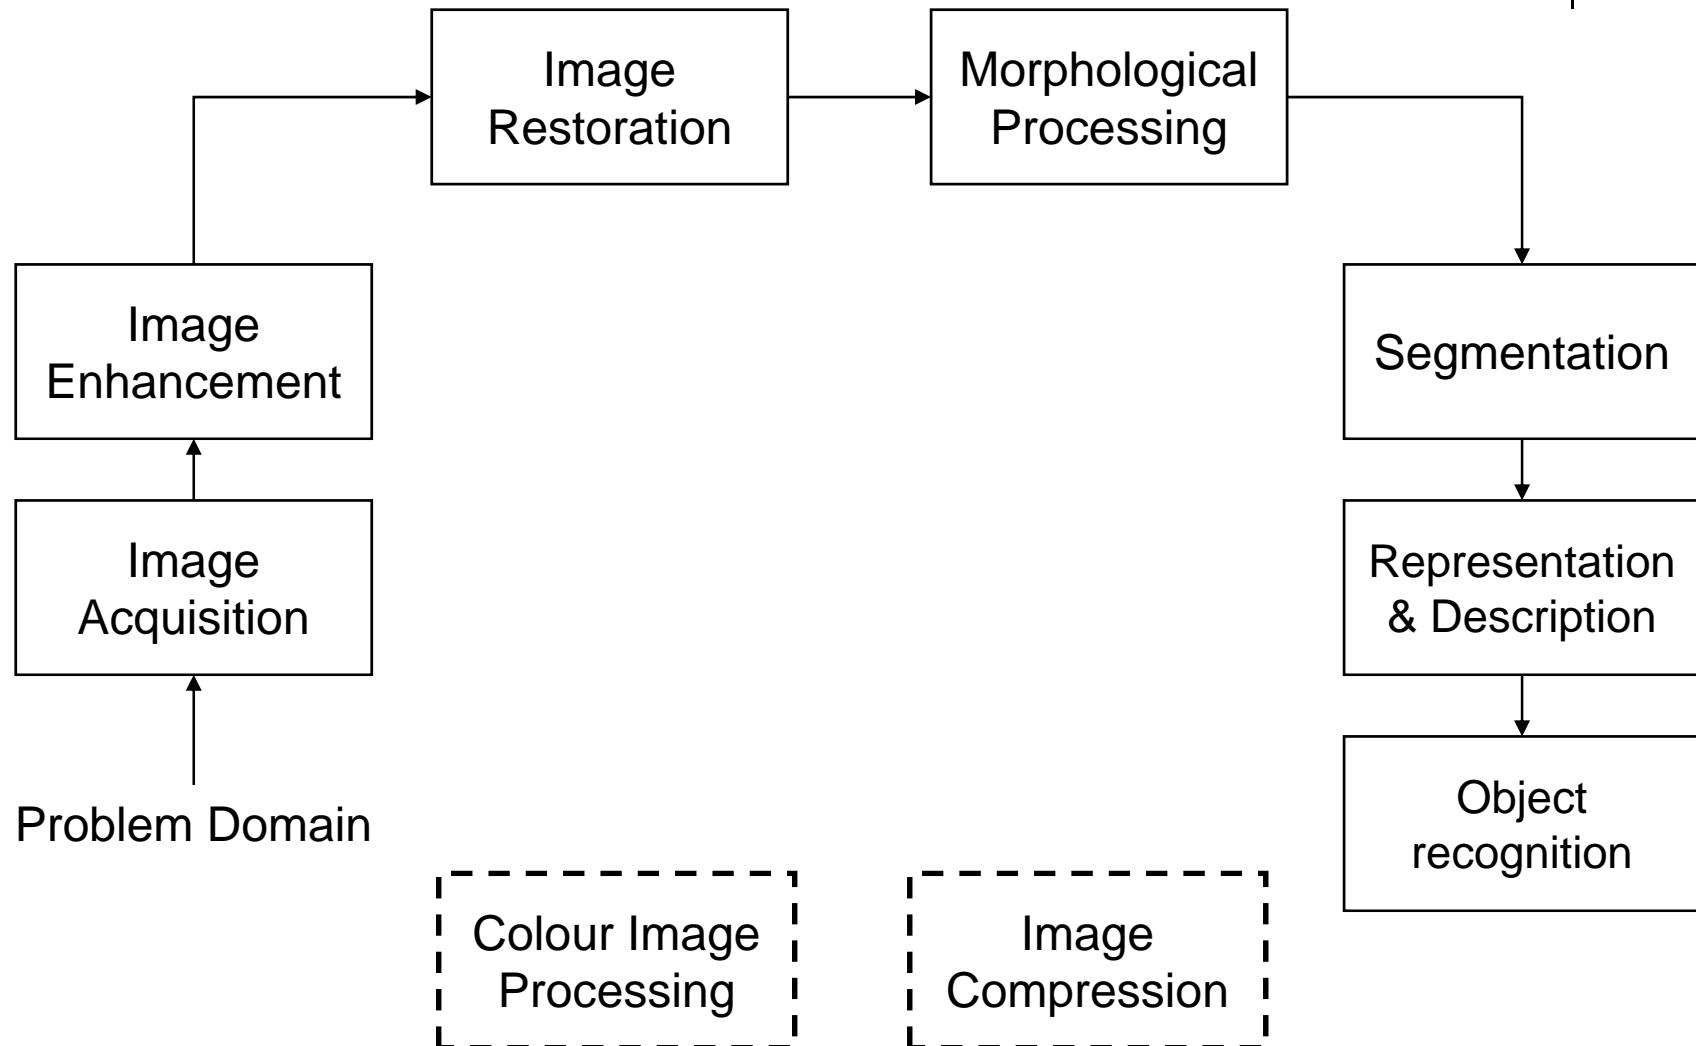

Image Analysis

Segmentation, image registration, matching

Image Processing

Image enhancement, noise removal, restoration,
feature detection, compression

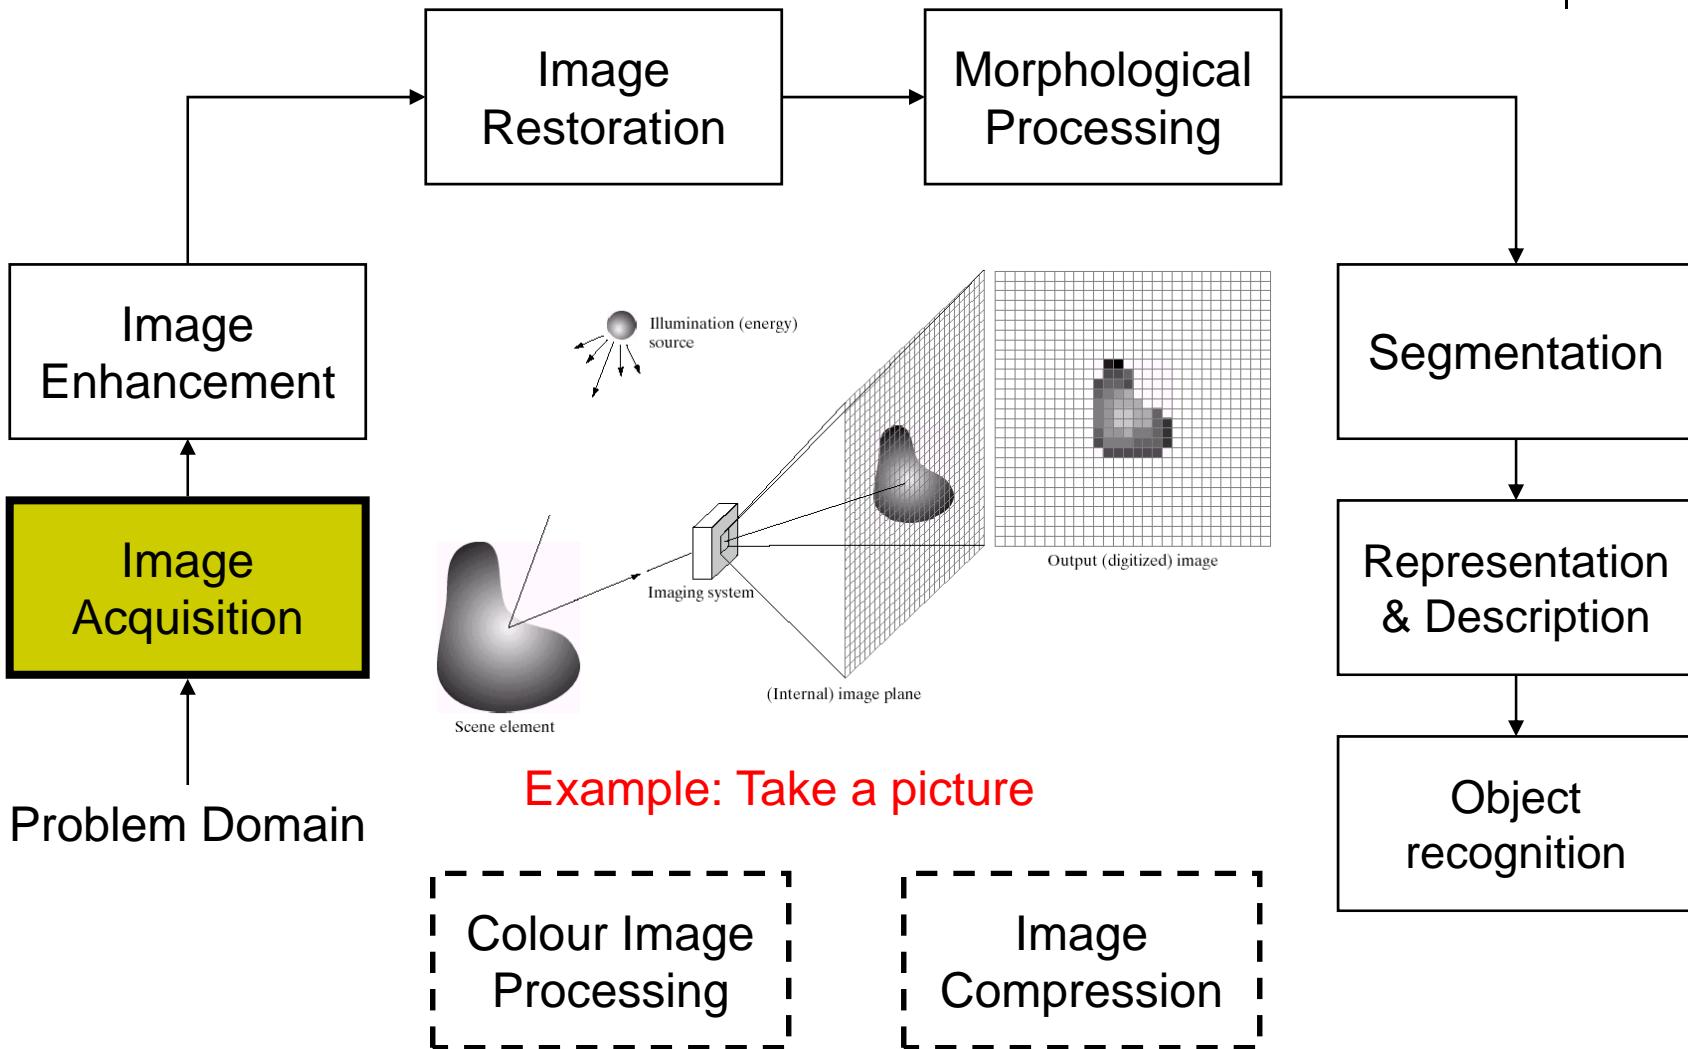

Key Stages in Digital Image Processing

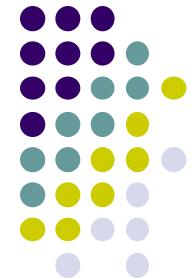

Key Stages in Digital Image Processing: Image Acquisition

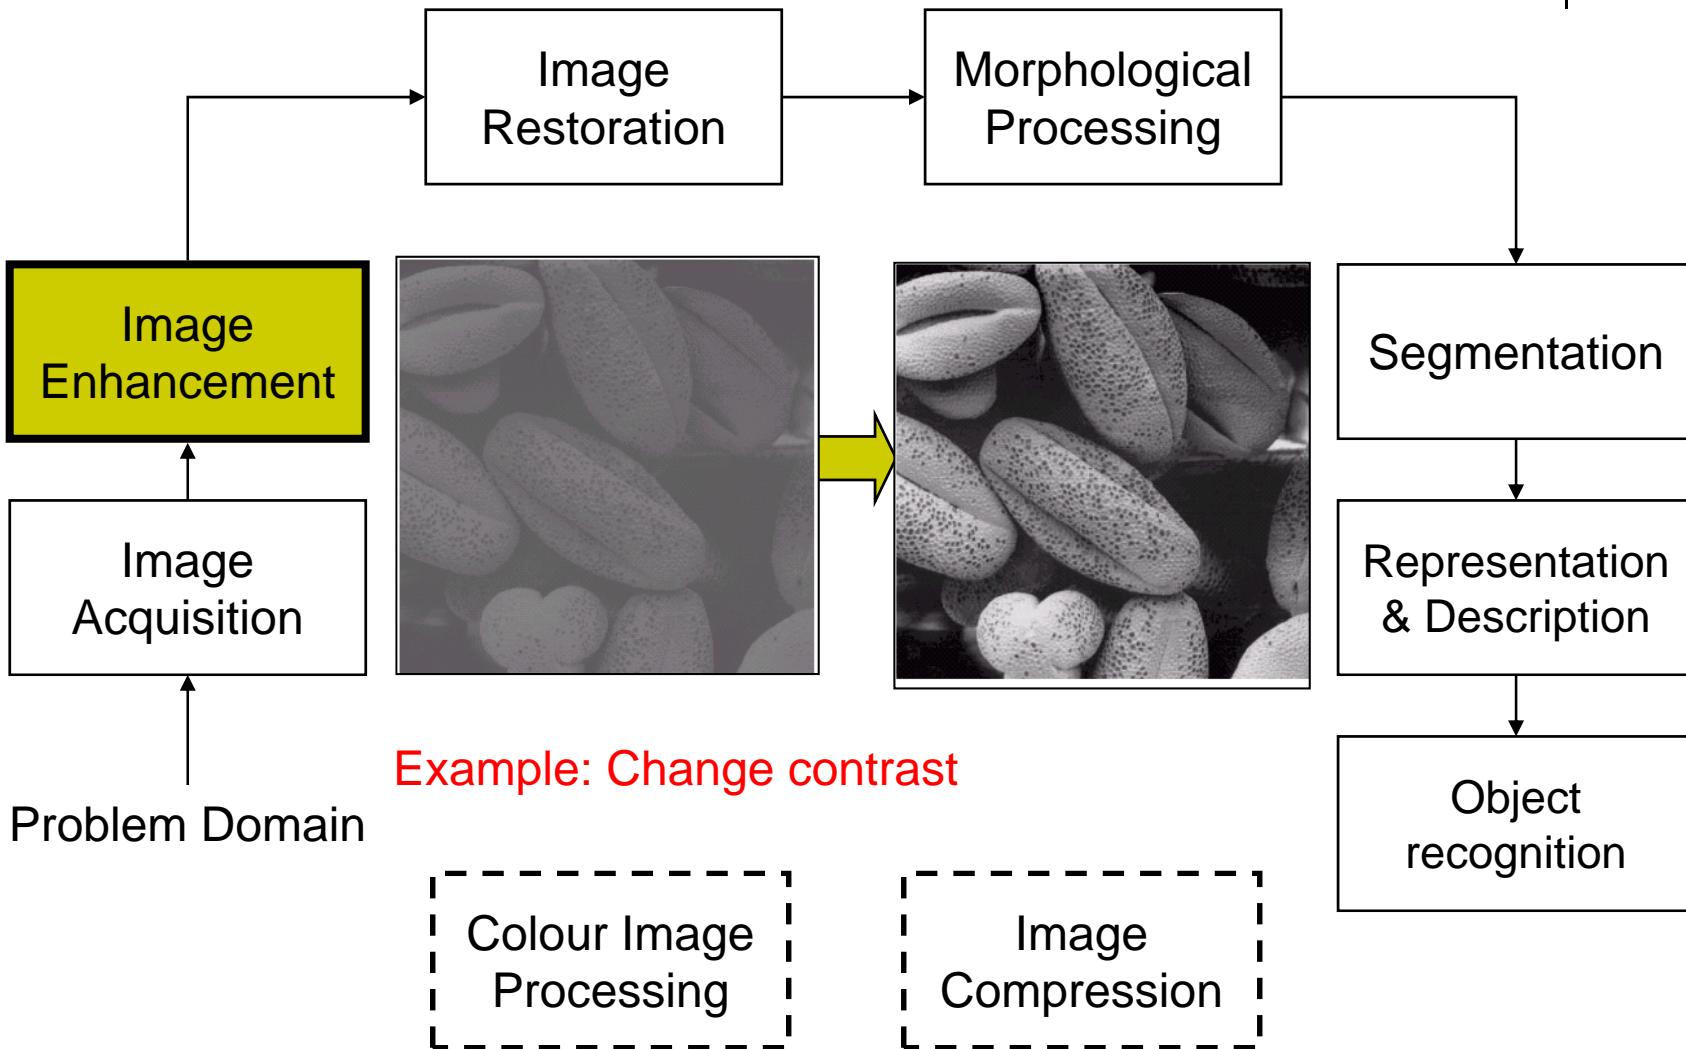

Images taken from Gonzalez & Woods, Digital Image Processing (2002)

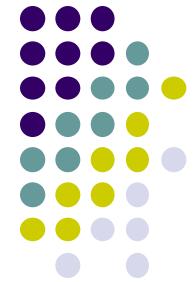

Key Stages in Digital Image Processing: Image Enhancement

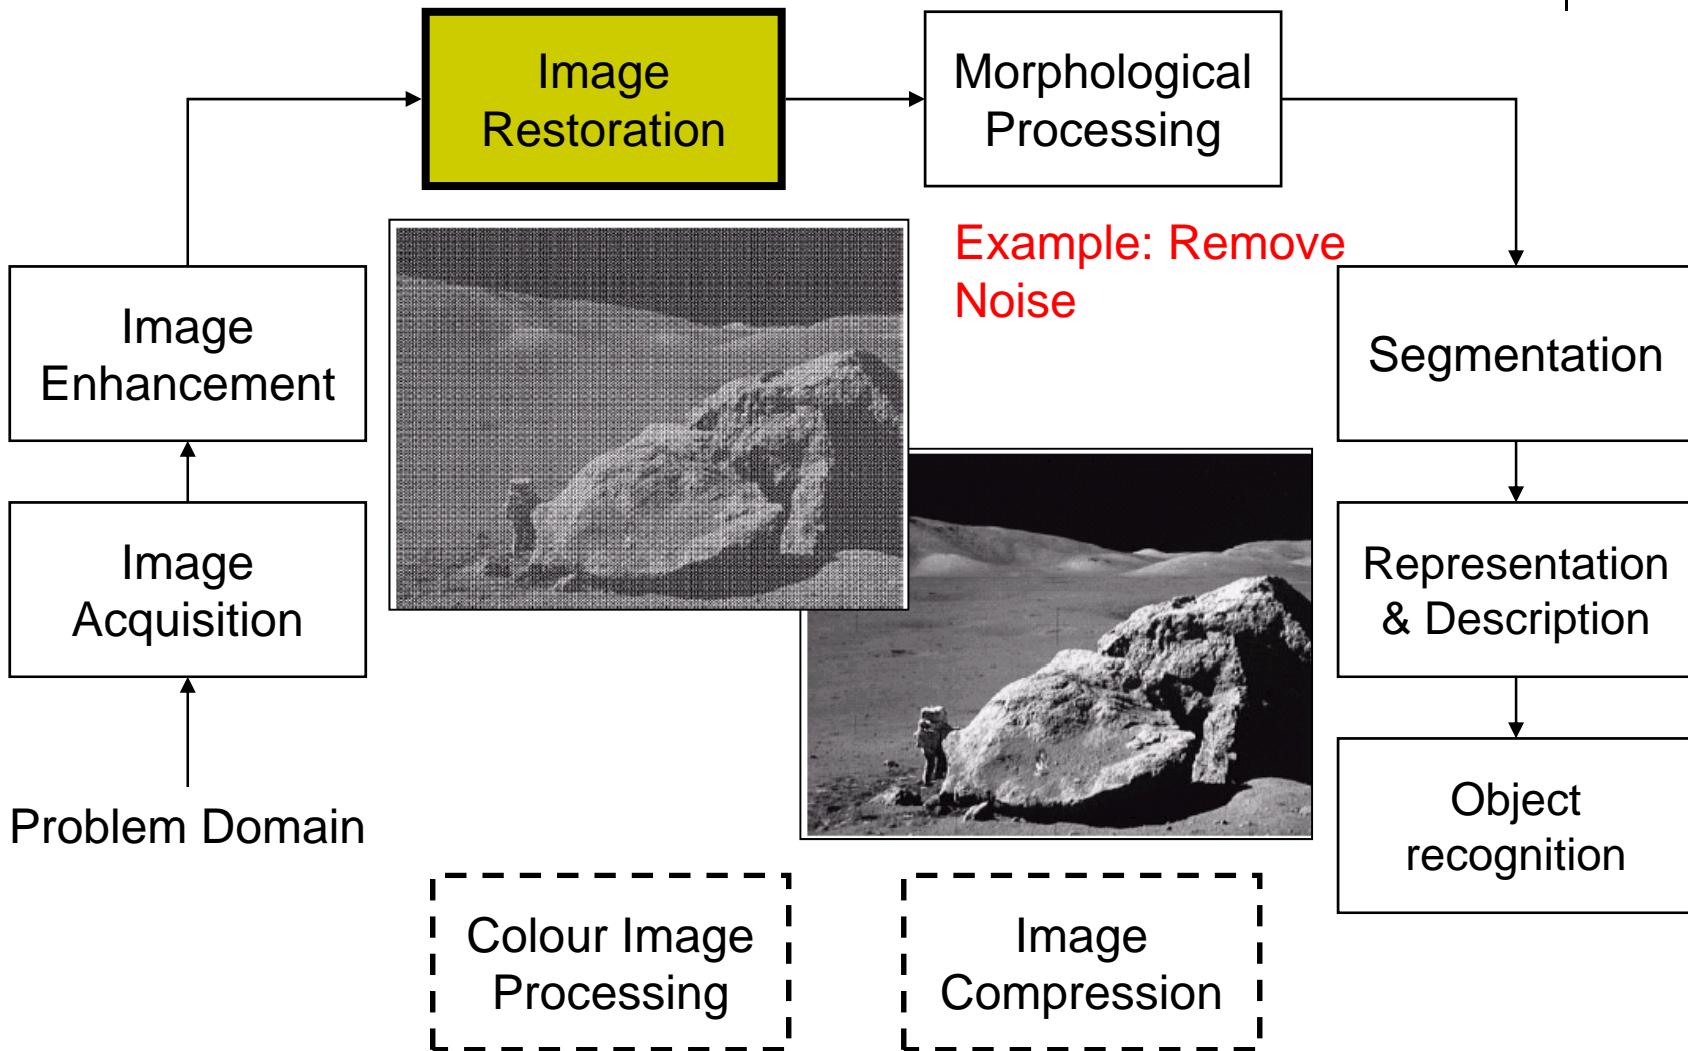

Images taken from Gonzalez & Woods, Digital Image Processing (2002)

Key Stages in Digital Image Processing: Image Restoration

Images taken from Gonzalez & Woods, Digital Image Processing (2002)

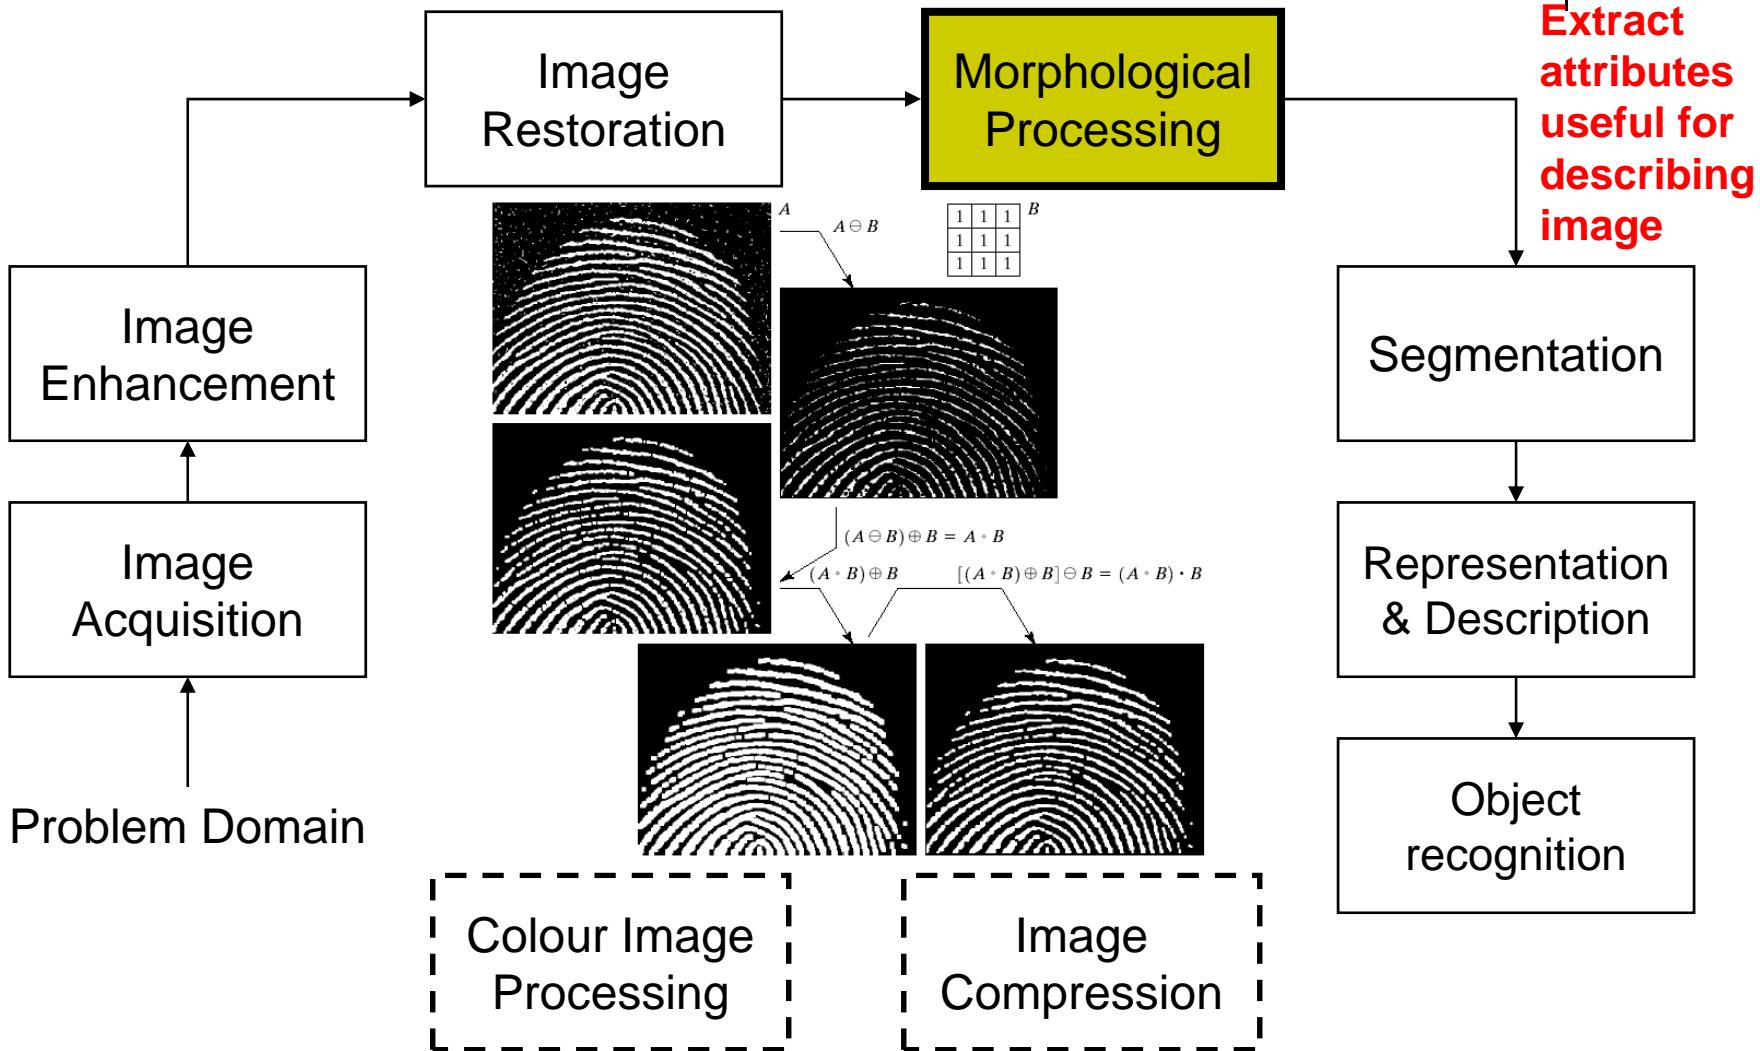

Key Stages in Digital Image Processing: Morphological Processing

Extract
attributes
useful for
describing
image

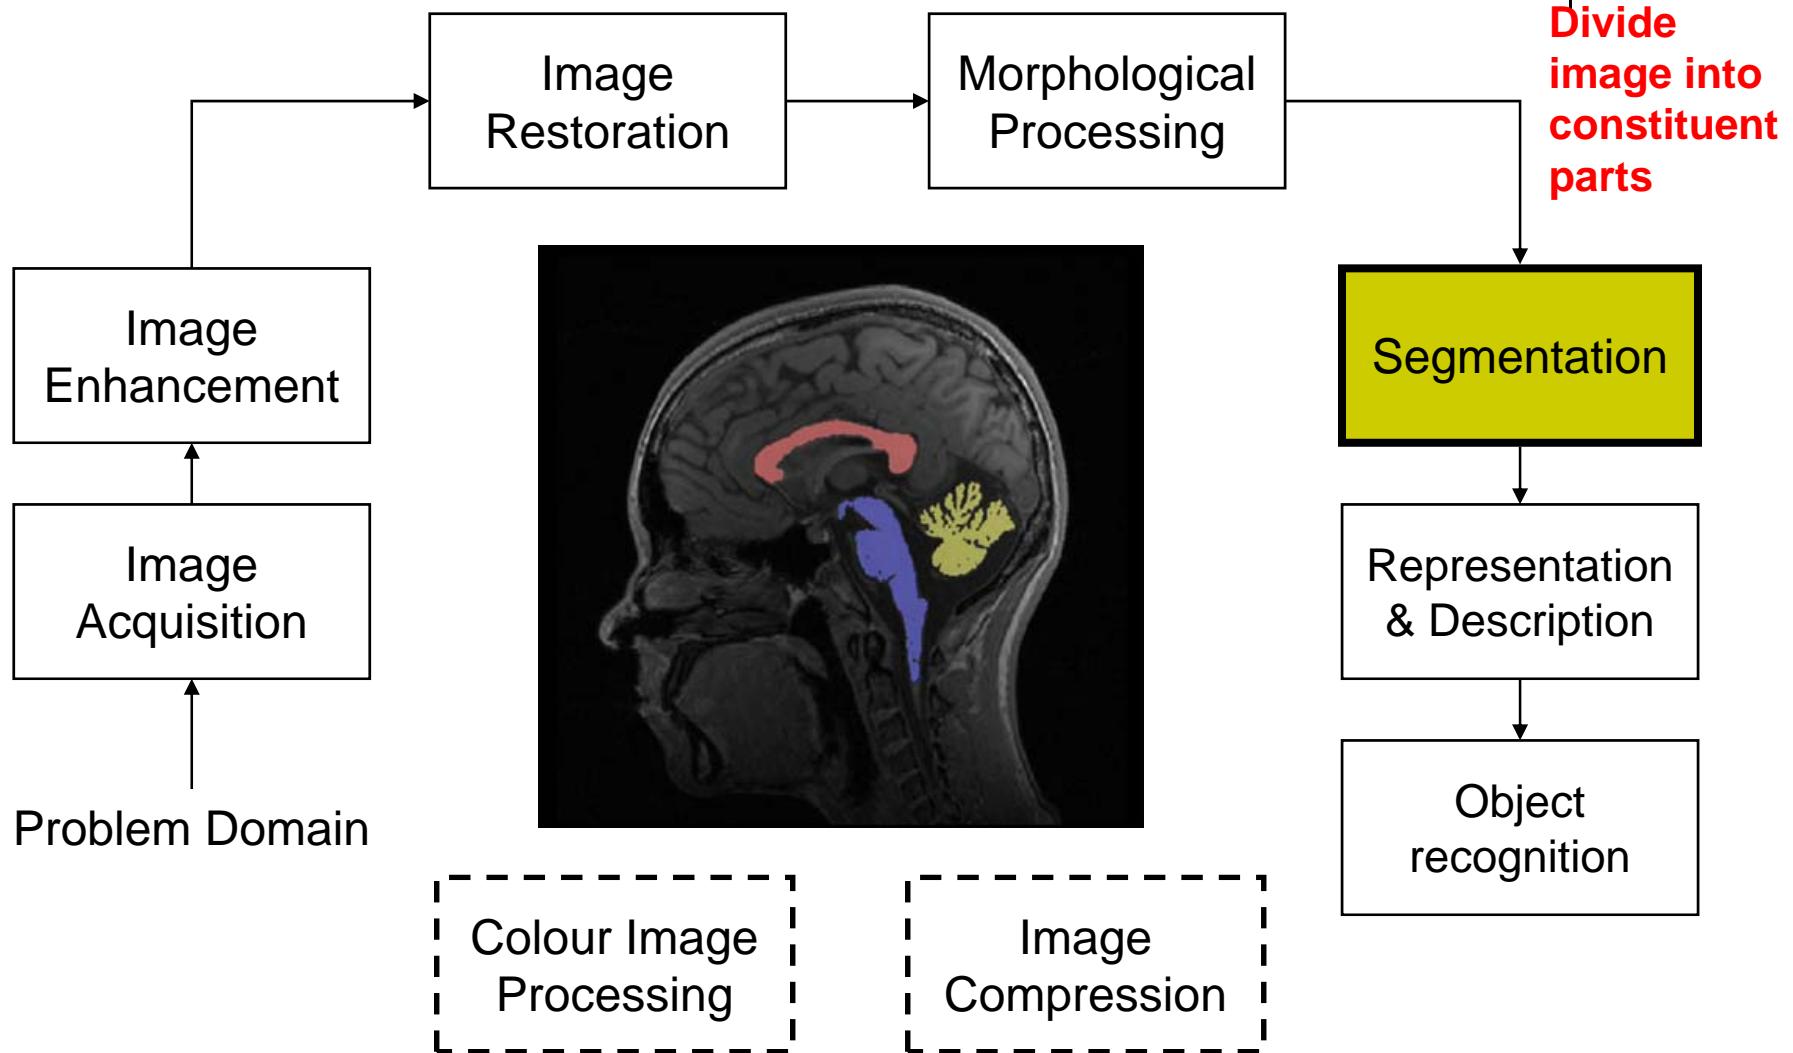

Images taken from Gonzalez & Woods, Digital Image Processing (2002)

Key Stages in Digital Image Processing: Segmentation

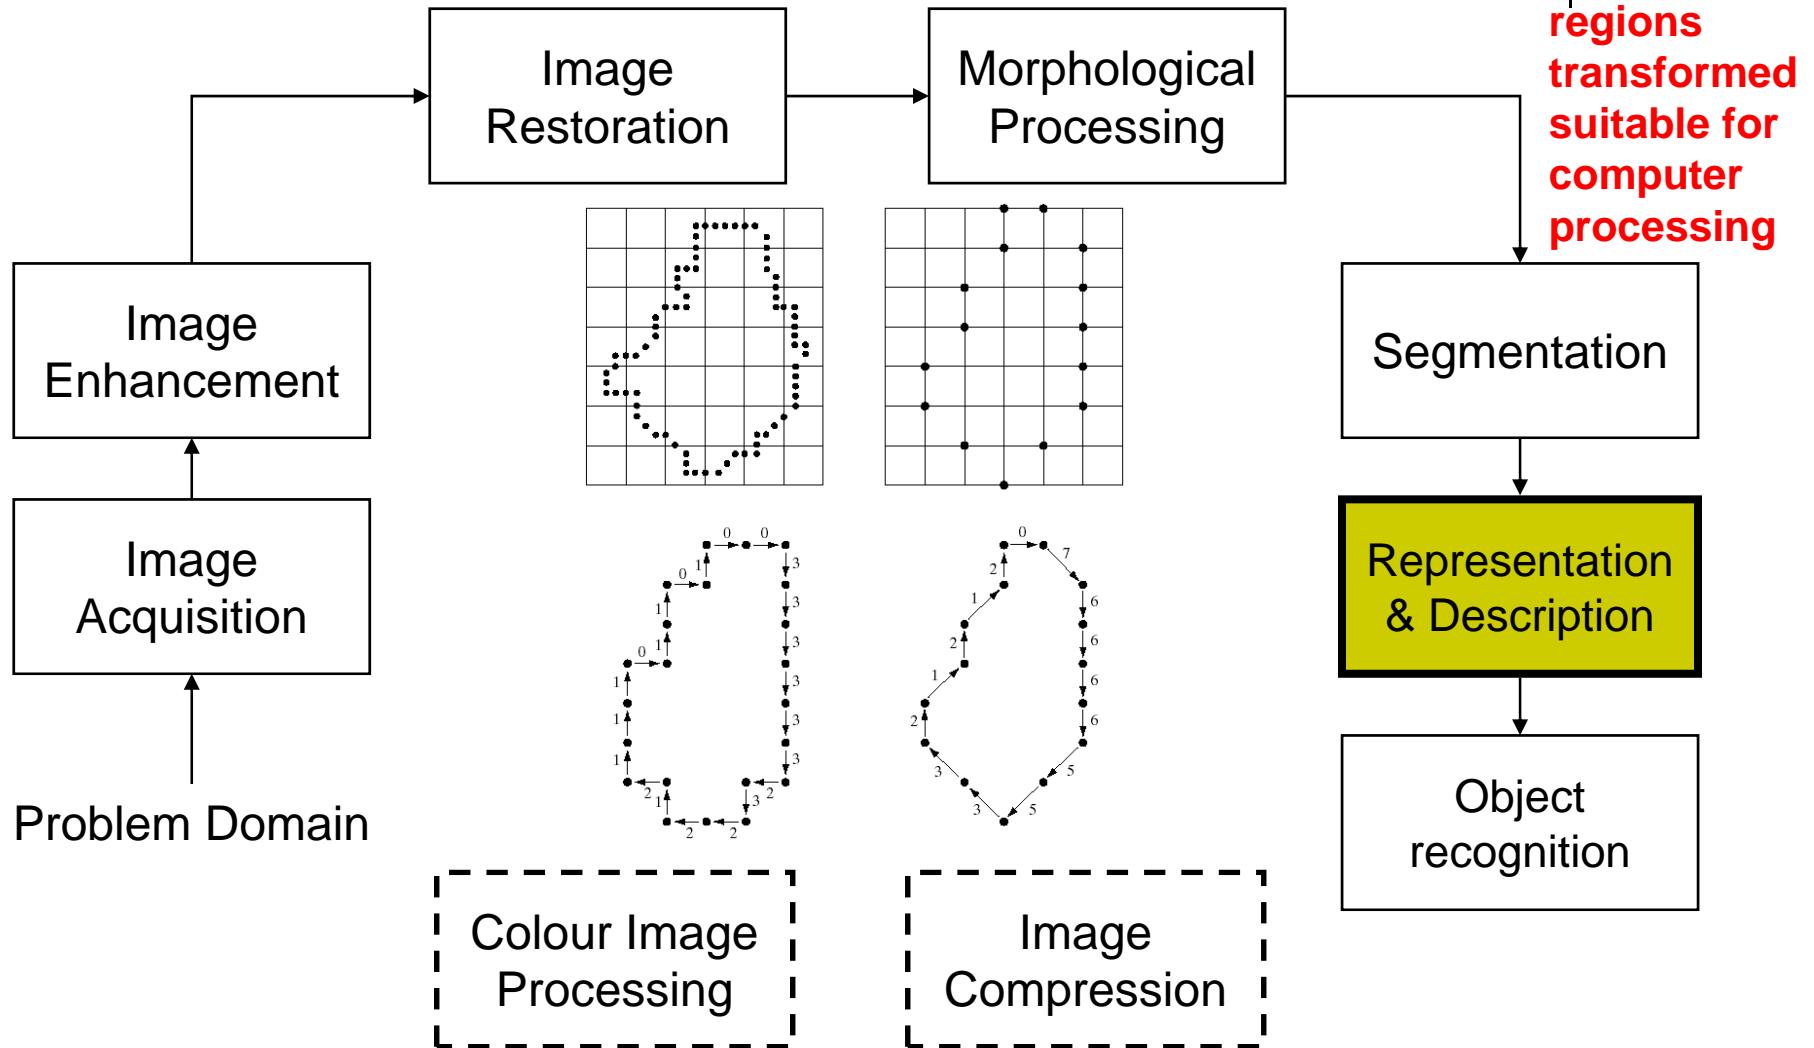

Divide
image into
constituent
parts

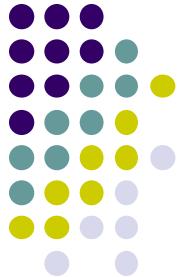

Key Stages in Digital Image Processing: Object Recognition

Image regions transformed suitable for computer processing

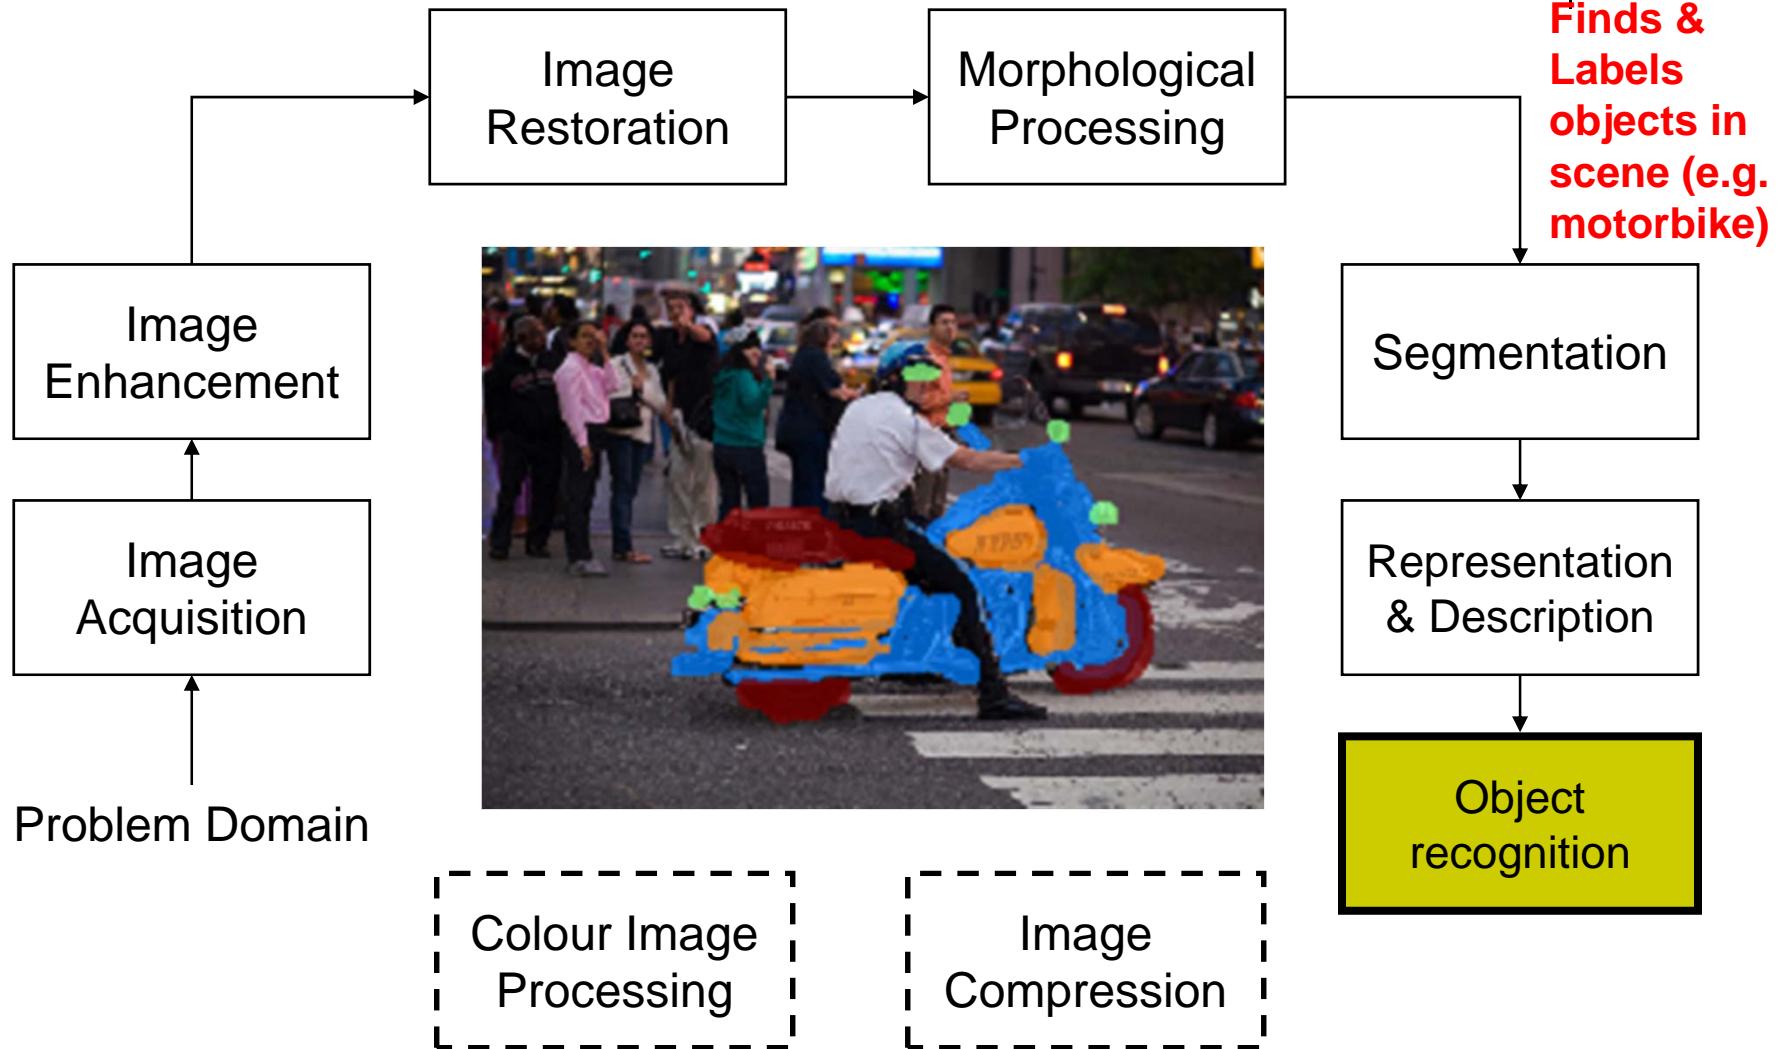

Key Stages in Digital Image Processing: Representation & Description

Finds &
Labels
objects in
scene (e.g.
motorbike)

Images taken from Gonzalez & Woods, Digital Image Processing (2002)

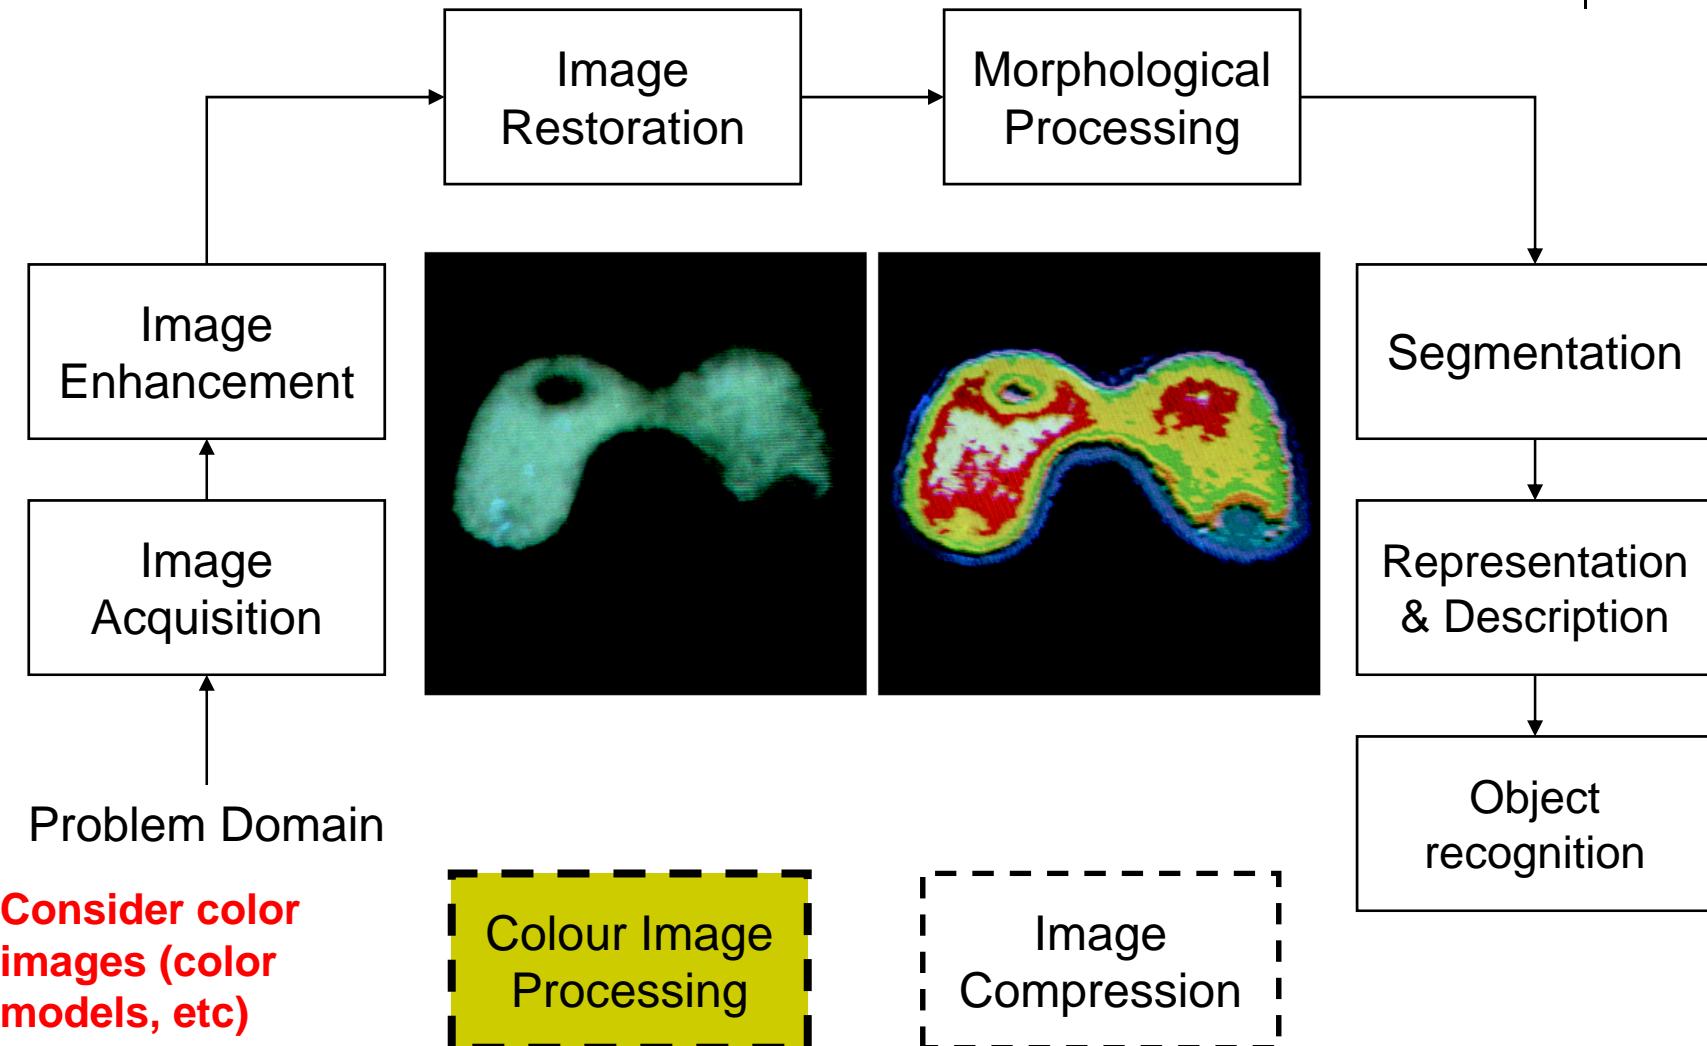

Key Stages in Digital Image Processing:

Image Compression

Key Stages in Digital Image Processing: Colour Image Processing

Mathematics for Image Processing

- Calculus
- Linear algebra
- Probability and statistics
- Differential Equations (PDEs and ODEs)
- Differential Geometry
- Harmonic Analysis (Fourier, wavelet, etc)

About This Course

- Image Processing has many aspects
 - **Computer Scientists/Engineers** develop tools (e.g. photoshop)
 - **Requires** knowledge of maths, algorithms, programming
 - **Artists** use image processing tools to modify pictures
 - **DOES NOT** require knowledge of maths, algorithms, programming

Example: Portraiture photoshop plugin

Example: Knoll Light Factory photoshop plugin

Example: ToonIt photoshop plugin

About This Course

- Most hobbyists follow artist path. Not much math!
- **This Course: Image Processing for computer scientists and Engineers!!!**
- Teaches concepts, uses Matlab/Python as concrete example
- Matlab Image Processing Toolbox
 - Includes lots of already working algorithms,
 - Can be extended by programming new image processing techniques
- Course is **NOT**
 - just about programming Matlab image processing toolbox
 - a comprehensive course in matlab image processing toolbox and python image processing library (PIL, scipy, opencv-python and so on)
 - about using packages like Photoshop

About This Course

- Class is concerned with:
 - How to implement image processing algorithms
 - Underlying mathematics
 - Underlying algorithms
- This course is a lot of work. **Especially heavy coding!!!**
Requires:
 - Lots of programming (maybe in MATLAB/Python)
 - Lots of math, linear systems, fourier analysis
